Adapting machines to people not people to machines

Fabrication, manufacturing, design, tools, technology, creativity, expression, product

Reason:

1.- Machines are there to improve our life

2.- If machines are here to improve our life

Why to get used to make long process to solve our needs?

Why to get use to not usual interfaces?

Problem:

Computing / recent technology

Adaptation / we are adapting ourselves to machines. The problem is to get used to it.

Understanding:

Natural behavior

Unnatural behavior

Analog technology

Digital technology

Interface

Natural interface

Solution

Natural behavior to natural interface

Machines improving people life

Test with kids (when they start in computing with BAP and without BAP)

Test with artisans (productive and creative process)
